MOBILE STRATEGY:

We recommend initiating the internal discussion around the selection of mobile devices as well as the mobile strategy that is right for your organization.

Discussion points:

- Will employees use their own devices (BYOD) or whether you will supply the devices to run the application?
- Consider branding the devices with a corporate logo to clearly identify a corporate device is in use.
- Consider a communication plan to clients/patients and their families that staff will be documenting using a mobile device while performing care.
