

## Solution Sheet

# Electronic Medication Administration Record (eMAR)

Simple, error-free medication administration and distribution

PointClickCare's eMAR manages the entire ordering and distribution process to ensure the right resident is receiving the right medication, in the right dose, using the right route, at the right time.

## Streamline medication ordering and administration

PointClickCare's electronic Medication Administration Record (eMAR) offers a full medication and treatment administration system with an optional ability to integrate directly with pharmacy partners. It can be included as part of the PointClickCare EHR platform or used as a stand-alone module for senior care facility-initiated or pharmacy-initiated models.

### How does eMAR help?

Enhances resident safety with alerts for missed doses

Eliminates paper burden in the MAR/TAR workflow

Improves med pass efficiency with Bar Code Administration

Facilitates compliance with documentation controls

Offers behavior monitoring and intervention tracking

## eMAR users can expect:

### Streamlined, Efficient Medication Administration

Computerized physician order entry (CPOE) improves the ordering process and distribution workflows, eliminating cumbersome MAR/TAR binders. Bar code administration quickly improves supply tracking and med pass operations. Month-end changeover activities are no longer required now that pertinent information is pushed directly into the resident's chart.

### Enhanced Care Delivery

Automating this typically paper driven process also allows the care team to not only be more efficient, but it offers data that could not be previously quantified, allowing for improved insights into each resident's health. Metrics in the portal provide views into overdue meds and other important pharmacy alerts. The Behavioral Monitoring & Interventions function also makes it easier to track and monitor behavior episodes from the point of observation through interventions and outcomes. These insights provide better data, and offer opportunities to improve timely care, treatment, and therapy.

### Improved Medication Safety and Compliance

PointClickCare eMAR reduces medication errors by automating the process, and by ensuring only medications specific to the med pass are presented to the care staff. The eMAR interface also presents resident photos to help identify the right resident, and color coding assists with medication timing. PointClickCare ensures the correct medication is ordered and administered to the resident, at the right time, offering additional safeguards that support the "Rights" of medication.
